

Graphoanalysis Services 2008

Memo to Handwriting Analysis Requestors
From Tom Kimball, Ph.D. 1774 Seacrest Drive, Lummi Island, WA 98262
Date Sunday, January 27, 2008
Subject **Description of Graphoanalysis Services**

Thanks Thank you for your inquiry about handwriting analysis services.

My proposal I propose to offer you a personal analysis of your handwriting. I have been a handwriting analyst since 1964. I did my doctoral dissertation on the validity and reliability of handwriting as a projection of personality traits.

Services Initial and ongoing services include

- compatibility comparison,
- career opportunities,
- interpersonal relationship analysis,
- screening applicants for various relationships or contracts.

Handwriting requirements Write spontaneously on any subject with your favorite pen or pencil. Sit in a comfortable position, not in a bumpy vehicle!
Write more text, rather than less. Write at different times and moods. If you can collect three pages of writing on unlined paper, then you'll be able to learn more about the trends in your personality.

Constraints Four things I cannot tell you about a handwriting sample:

- handedness (left or right) of the writer,
- physical age of the writer,
- gender of the writer, *or*
- the future (*I can* predict trends of behavior, based on trait percentages).

All other traits of personality and character are accessible in the sample.
