

Schedule of Graphoanalysis Services

Business Reports

Fee

1. Identification of Job-related Traits:

\$75 per person.

Client provides a job description, with a sample of prospect's handwriting*.

Graphoanalyst provides a detailed report on the presence and intensity of those traits shown in client-provided sample relating significantly to job performance.

The report includes these categories of traits:

- Emotions
- Imagination
- Mental Processes
- Forces To Achieve
- Fears and Defenses
- Integrity
- Sociability
- Aptitudes

2. Ranking Job Prospects' Writing Samples:

\$100 + \$75 per prospect

Client provides

- job description
- two or more samples of prospects' handwriting*.

Graphoanalyst provides preferred ranking of prospects' samples, based on

- Graphoanalysis report of each sample
- relative match to the job description.

3. Job Compatibility Study:

\$300 for two persons; \$400 for three.

Client provides

- description of job(s) and job setting(s)
- handwriting samples* of compatibility candidates.

Graphoanalyst provides detailed report on presence and intensity of those traits shown in the samples provided relating significantly to

- job performance.
- workteam compatibility.

Constraints:

Graphoanalyst is unable to report only four facts about a handwriting sample:

1. handedness of the writer (left or right),
2. physical age of the writer (differs from emotional age),
3. gender of the writer, or
4. future events.

Personal Reports

Fee

1. Personality Traits Survey:

\$50 for one person.

Graphoanalysis of one person's handwriting sample(s)* provides a general report on the presence and intensity of personality variables revealed in the sample, organized in these trait categories:

Emotions	Fears and Defenses
Imagination	Integrity
Mental Processes	Sociability
Forces To Achieve	Aptitudes.

2. Compatibility Study:

\$300 for two persons; \$400 for three.

Graphoanalysis of the writing sample for each of two or more persons, including a summary report of their similarities and differences.

Directions to provide accurate information for Graphoanalysis:

- Select your favorite pen or pencil.
- Use plain, unlined paper (8.5 X 11 inches).
- Write each sample spontaneously on any subject.
- Write in a comfortable position.

When you provide three pages of cursive writing on unlined paper, then you will express more about the trends in your personal behaviors. If you “print,” please include some cursive writing in your sample, too. Neither spelling nor neatness matters to the Graphoanalyst.

Notes:

Graphoanalyst pays no attention to thought content, but only to the strokes. Text that you copy is not so natural as spontaneous thoughts that you put down on paper. Length of your writing specimen is important, because when you provide more strokes, then your Graphoanalysis is more accurate.

Use this table to decide how much writing to provide:

IF the Graphoanalysis is for a ...	THEN sample length is
Personality Trait Survey	One or more full pages <i>Note:</i> Collect writing specimens at various times.
Identification of Job-related Traits, or Ranking Prospects' Specimens	One full page <i>Note:</i> Specimen may be a job application
Compatibility Study	Three full pages
