# Guidelines for Planning your Lessons

**Guidelines**     Apply these guidelines when you plan lessons.

- Sequence learning events along the Learning Line from concrete
  to abstract, rather than jumping directly to the abstract.

- Accommodate learning *modes* by using a variety of inputs –
  – visual,
  – auditory, *or*
  – hands on.

- Accommodate learning *styles* by directing learners through the sequence
  of phases in the Conscious Competence process.
  1. Orientation
  2. Persuasion
  3. Instruction, guided practice, and closure
  4. Independent practice
  5. Evaluation.
